

REVO

*With a fully-articulating body, Revo seamlessly bends, tilts, twists, and turns—just how you want it. And with the optional occupancy sensor, it shines when you want it—automatically turning on when you're present and off when you're not. Or for more control, its highly-efficient, dimmable light adjusts with a single touch. An optional integrated USB port in the base allows for charging of mobile devices. **Proudly designed and manufactured in Grand Haven, Michigan.***
